

# STORAGE PACK PRODUCT Portfolio

High level  
Description

Cylinder packs are arranged with cylinders positioned vertically and equipped with a drainage system to allow the emptying of any liquid that accumulates inside them. Cylinder pack can be installed entirely or in part in the compressor room, in a dedicated room or outside, depending on specific case and the regulations of the destination Country.

## Datasheet

CYLINDER (No.)	CAPACITY (liters)	CAPACITY – m3 @ 250 bar (CF @ 3,625 psi)	DIMENSIONS LxWxH – Meters (feet)	WEIGHT - Kg
2	160	42 (24.8)	0.7x0.3x2 (2.3x1.0x6.6)	295
7	560	150 (88.5)	2.1x0.3x2 (6.9x1.0x6.6)	765
14	1,120	300 (177)	2.1x0.6x2 (6.9x2.0x6.6)	1,530
21	1,680	450 (265)	2.1x1.0x2 (6.9x3.3x6.6)	2,295
28	2,240	600 (354)	2.1x1.3x2 (6.9x4.3x6.6)	3,060
35	2,800	750 (442.5)	2.1x1.6x2 (6.9x5.3x6.6)	3,825
42	3,360	900 (531)	2.1x2.0x2 (6.9x6.6x6.6)	4,590

## Benefits

### HIGH FLEXIBILITY

Their flexibility make them the right solution as they can “acting” as compressor BLOW-DOWN, as PULSATION DAMPING on the compressor discharge, as STORAGE, especially in plants with a gas flow-rate that varies during the day, providing the entire system with high availability and reliability.

### HIGH CUSTOMIZATION

The design and the installation can be tailored according to Customer's need, technical requirements and Country regulations. They can be installed in a metal housing, in the container together with compression skid or outdoor. In addition we can provide shut-off valves for each one.
